

FISHER & PAYKEL

DESIGN PHILOSOPHY

At Fisher & Paykel, we're curious about people — how they live, what they do and how they use things. This approach has helped us to understand the dynamic nature of modern living and to design appliances that are intuitive and timeless. We've observed that there's been a shift in the way people plan and use a kitchen. The kitchen is not only a working space but also the social hub of the home. Today's kitchens are coherent, considered spaces, and appliances need not only to fit physically, but to fit aesthetically as well. As much high-performance appliances as design components, we create products that fit the lives lived around them.
